DETAILED ACTION

Receipt is acknowledged of the amendment filed 12/11/2008.

The rejection under 35 USC 112, first paragraph have been withdrawn in view of applicant's remarks.

Applicant's amendments to the claims adding bioactive material and multilayer forms have been noted. However, a review of the reference shows that these features are further taught by the reference.

The following rejection is therefore maintained in this action:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9, 11-30, 53-55, 57 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 01/78906 (Spillman).

Art Unit: 1615

Spillman discloses an alternating thin film of alternating charge. Further, nanoclusters of ZrO_2 , Al_2O_3 or TiO_2 are also disclosed. This film may be used to coat catheters, stents and similar medical devices (see Abstract). Charged polymers are found at page 5 lines 1-11 and include fullerenes and nanotubes. Ceramic particles disclosed at page 8, lines 12-13. Alternative layering is disclosed at pages 9-10. Nanoclusters are disclosed at page 12, lines 19-29. The size of the layers is disclosed as between about 0.1 to 100 nm (page 13, lines 12-15). Multilayered forms are disclosed at page 13, line 5; page 15, lines 18-25; claims 74 and 75; and Figure 10 (a-d). A bioactive is included in the invention at claim 15; [0068] – [0075] for specific bioactives. The instant claims are anticipated by Spillman.

The following is a new rejection of the claims:

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 56 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Support could not be found for the “fibrous reinforcement member” of claim 56.
Clarification is requested.
